PLATFORM

Everything you need at one place

Complete interview preparation platform with AI-powered tools and
comprehensive learning resources

AI COACHING

AI Coach - 1:1 Tutoring

Real-time voice tutoring with visual explanations
on any interview topic

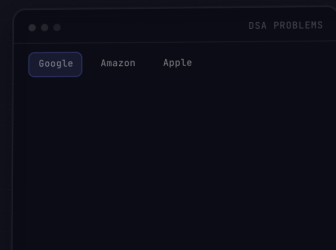

- Voice-based 1:1 sessions on all patterns
- Visual diagrams drawn in real time
- Personalized to your weak areas
- Auto-generated session notes

DSA PATTERNS

DSA 90+ Pattern Mastery Track

Master algorithmic thinking with curated patterns
and frameworks

- 90+ patterns with video explanations
- Real interview question mapping

- Progressive difficulty curve

COMPANY PREP

Company Wise Kits

Pattern-first prep kits for top tech companies

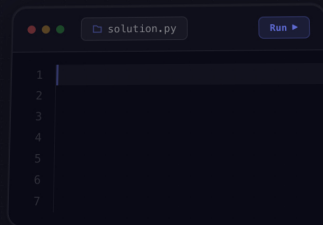

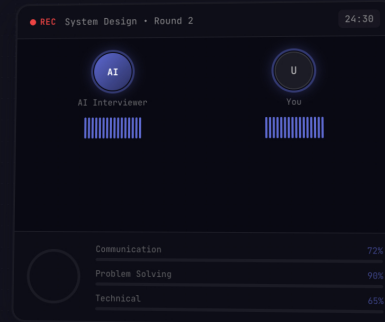

- Company-specific DSA sheets
- Pattern & difficulty breakdown
- Filter by company, unlock on Pro

INTERVIEWS

AI Mock Interviews

Adaptive AI interviews with instant scoring

- Real-time adaptive questioning
- Behavioral + technical rounds
- Instant feedback and scoring

CODE PRACTICE

AI Code Practice

Write, run, and get AI feedback on your code

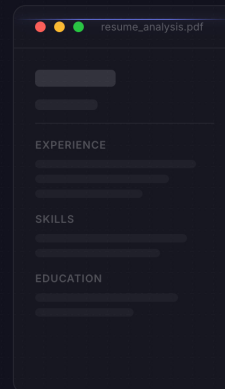

- Smart analysis & optimization hints
- Multi-language support
- Real-time test execution

RESUME AI

Resume Analysis & Generation

AI-powered resume scoring and optimization

- ATS compatibility scoring
- Keyword & impact enhancement
- Professional template generation

LEARNING PATHS

- 2 Two Pointers
- 3 Sliding Window
- 4 Trees & Graphs

Structured Learning Paths

Guided tracks across DSA, system design, PM, and data science

- DSA, System Design (LLD & HLD)
- Product Management & Strategy
- Data Science, AI & LLMs

Your next FAANG offer starts here.

Join 25k+ engineers who transformed their careers with Thita.ai's comprehensive platform: DSA patterns, AI interviews, system design practice, resume optimization, and personalized coaching. Start your journey today.

Hi Swati,

Saw your DSA patterns list. Thank you :)

Regards,
Rohan

I spent thousands on interview coaching before finding thita.ai. The AI gives similarly detailed feedback, available instantly, at a fraction of the cost. The code review feature caught edge cases I always missed. This platform is seriously underpriced for what it offers.

[deleted] · 2mo ago

I have seen neetcode Q and striver Q, both are good but I guess the pattern approach is still not so relevant in their list and tbh ur sheet is very intuitive and helpful mam thank you pls see the DM have more qns

34

Thanks

Also wanted to tell that this sheet is like goldmine for patterns, haven't seen any other sheet with such depth

With a full-time job and family, I could only study late

Longjumping_Dot1117 · 2mo ago

You are amazing. This is what I wanted. Striver sheet and other popular sheets were not deep enough. And I was just solving random hard problems. Hopefully you sheet covers indepth variations.

Feedback:

Starting DSA learning and jumping on solving random problems without any roadmap and structure is like

[deleted] · 2mo ago

2

applying a brute force solution which is costly. The efficient solution is using "Thita.ai".

It has a very structured approach. We start from the basics, and learn all the patterns step by step. Each pattern explains everything that we need to know along with most commonly asked questions, followed by relevant problems.

And this is just beginning. It also offers AI mock interview, resume support, system design, and more.

Highly impressive and recommended.

With a full-time job and family, I could only study late nights. Unlike other platforms that require scheduling with peers, thita.ai's AI interviewer was always available. Practiced during my own hours and cleared my interviews after 2 months of consistent prep.

No-Lizards · 1mo ago

I will dedicate my firstborn son to you because of this list
